

***The Largest Design &
Manufacturing Show Booth #254
PORTLAND EXPO CENTER***

**SEPTEMBER 16TH & 17TH WEDNESDAY 9:30 - 4:00, THURSDAY 9:30 - 3:00
FREE PARKING, FREE ENTRY**

OVER 300 MANUFACTURING CATEGORIES!

The Design-2-Part Show is a total design, engineering and manufacturing experience. Face-to-face discussions provide instant answers for design ideas, prototypes, short runs, long runs, new processes or re-engineering of a component.

IMPROVE QUALITY, COST, AND DELIVERY IN ONE DAY!

It's all here! Nowhere else will you find the brightest minds in contract manufacturing with all of the manufacturing processes you would need. Find new suppliers for current projects or see what's new in the industry for your future needs. We guarantee that everyone will find something useful at this show.

BRING PRINTS AND PROBLEMS!

How often do you get the opportunity to compare suppliers? D2P brings you the best contract shops - JIT, SPC, ISO and more... so you can quickly see if you are using the best methods or the most efficient manufacturing process to maximize the value of your finished product.

With so much manufacturing expertise at your disposal, it only makes sense to come to the D2P show armed with prints, designs or samples of your upcoming requirements. Make the most of your face-to-face meetings and get your project rolling right at the show. Another benefit is that you can have suppliers from multiple processes meet with you together to work out a team approach to sourcing.

A WORLD CLASS SHOW BECAUSE WE ARE THERE!

This is the largest face to face show in the Northwest region that exclusively focuses on design, electronics and contract manufacturing services. Just minutes from the Portland Airport, the Expo Center is conveniently located off of I-5 between downtown Portland and Vancouver Washington. Touch parts, talk to the experts and solve your supplier issues in one day!

This show will bring you the top contract manufacturers both locally and nationally. OEM engineers and buyers from Oregon, Washington and Idaho are already scheduling to attend the region's sourcing event of the year.!

From the point of inception (design and prototypes), to the complete outsourcing of the parts, components and assemblies, it's all here. One day at this show will help you research advanced technologies, vendors, and processes to do your job better and get to market faster. This show is really worth the drive!!

The focus is on outsourcing and manufacturing technologies in forming, fabricating, finishing, shaping assembly, design, prototyping and engineering with many exhibitors specializing in electronics, automotive, and machinery.

**Exclusively Promotes
American Contract Manufacturers**
